

- automatic or manual triggering
- compensation for local noise levels
- robust vandal/weatherproof housing

Voltage	12Vdc
Tones	Single tone above 16KHz
Sound Output	High and low setting with automatic ambient compensation
Compensation	Output is automatically increased to be 5 to 8dB above the ambient, up to the maximum for each setting
Operation	Setting 1 - Tone operates for 20mins then silences and awaits retrigger Setting 2 - Tone operates continuously until switched off
Activation	Mode 1 - Alarm operates at power on Mode 2 - Alarm operates in response to external trigger (PIR etc.) Mode 3 - Alarm operates in response to built-in voxswitch (noise activation)
Protection	Vandal and weather resistant IP65 enclosure suitable for external use
Temperature	-20 to +70C
Material	Diecast zinc alloy and steel
Mounting	Wall mounting, angle bracket available
Colour	Grey
